PS FINANCE TECHNOLOGY
IN A GLOBAL MONETARY POLICY

The course will tell you everything you need to start a safe investment in digital currencies. You will learn about their pros and cons as compared to fiat currencies (traditional) and decide for yourself which suits you better. According to world economists, the coming decade is to be a breakthrough for the finance sector mainly thanks to the blockchain technology on which cryptocurrencies are based. It’s worth getting to know it now, before it stays in the mainstream permanently. The course is designed to provide an introductory understanding of decentralized digital currencies (cryptocurrencies) such as Bitcoin. In particular, the course will survey the theory and principles by which cryptocurrencies operate, practical examples of basic cryptocurrency use, including clients, wallets, transactions. We’ll look at the cryptocurrency ecosystem financial services and discuss the existing and potential interaction of cryptocurrencies with the banking, financial, legal and regulatory environment. Lastly we’ll examine in detail, how cryptocurrencies can be viewed from an innovation perspective and what opportunities they present for the developing world.

PARTICIPANT PROFILE
Anyone who wants to:
• get to know the world of cryptocurrencies, blockchain and understand it,
• know cryptocurrencies from A to Z,
• know what Bitcoin, Altcoin is,
• learn to buy and sell BTC or Altcoins,
• validate and invest in cryptocurrencies,
• understand what blockchain is and what cryptocurrencies are about,
• securely earn money by investing in cryptocurrencies,
• know the best cryptocurrencies for 2019,
• understand the upcoming financial revolution,
• 100% protect against hacker attacks,
• expand their knowledge and learn the rules of the game on the stock market.

KEY BENEFITS
• You will learn everything you need to start a safe investment in digital currencies, and about their pros and cons in comparison to fiat currencies (traditional).
• You will be able to navigate the world of cryptocurrencies, validate and invest, buy and sell BTC and other cryptocurrency.
• You will know the mechanisms, techniques and procedures in the crypto world, learn how to get the latest information from the crypto world and how to use it, read stock market charts, etc.
• You will learn how to:
  – analyze and search cryptocurrencies for the best investments,
  – create accounts and use the 4 largest stock exchanges in the world and in Poland,
  – use secure and reliable information sources,
  – safely invest in cryptocurrencies – fundamentals of technical and fundamental analysis.

Total hours: 160
Tuition fee: 11000 PLN (can be paid in 2 instalments).
Classes will be held every two weeks on Saturday 8.00–17.00 and Sunday 9.00–15.00.

PS INTERNATIONAL FINANCE

This is an intensive and ambitious programme offered jointly by SGH Warsaw School of Economics and the EY Academy of Business. This programme is addressed to professionals who may or may not work in financial positions, but for whom finance is essential for their career.

Candidates come from various professions and industries, both the private and public sectors, including legal, accounting, marketing, HR, sales, IT, banking, retail, consulting, etc. Candidates will receive practical, expert, internationally acclaimed tuition, training, and world-class reference materials that can be used later on at work or for further studies. The trainers are all practitioners with local and international experience and skills.

All topics will be covered from scratch. Those new to finance will be given special attention and resources. The group will progress to an advanced level at a rapid pace.

PARTICIPANT PROFILE

- No matter whether you are in the public or the private sector, working in marketing, IT, administration, tax, law, or HR, this programme is for you!
- The studies are designed for those who do not work in finance and would like to develop their competencies in this area. These studies may open the door to your career in finance and beyond!

KEY BENEFITS

You will acquire skills in:
- practical use of the IFRS and US GAAP accounting rules and techniques
- assessment and interpretation of financial information prepared according to IFRS and US GAAP
- identifying and implementing financial strategies
- making financial decisions at each management level
- participating in strategic decision making regarding planning and monitoring
- anticipating and minimising possible risks

Total hours: 163
Tuition fee: 8000 PLN
Classes will be held on weekends 9:00AM–4:30PM.

TESTIMONIALS

International Finance has been a pleasure: I now like finance even more! You have helped me to get a promotion and finally I understand what double entry is. I work in an international company, and I must admit that since taking International Finance I have become more confident in talking with my UK boss. As for the online sessions – thanks to multiple screens, notes, and chat – these were the best virtual & multicultural meetings I’ve ever had.

Sylwia Karolczyk, Finance Coordinator, OC&C Strategy Consultants

For a medicine graduate like me pursuing a career in finance, the International Finance programme was the best choice – it covers finance in international context, it is taught in English, and is held during weekends so you can complete it in just one year! In my job I analyse financial statements as well as raw data and its breakdowns. This course helped me to understand them, and I’ve learned to draw the right conclusions. The financial instruments classes were eye opening for me and made me understand how they work and how they’re used in the real world. The tutors were very good and loved what they’re doing. This attitude motivated me to learn and study even more.

Jan Wagner, Associate, International Consulting Company
